## HOW A PUZZLE WAS SOLVED.

When you want a certain article, you want the best make of that article. But how to determine which make is best is what puzzles you, isn't it?

And when the puzzle is solved for you, you are pleased, aren't you?

And you would like to hear of one puzzle that has been solved for the people of the whole world, wouldn't you?

Well, we will tell you about that very puzzle, and its solution.

At the Universal Exposition of 1889 at Paris, France, the best sewing machines of the world, including those of America, were in competition. They were passed upon by a jury composed of the best foreign mechanical experts, two of whom were the leading sewing machine manufacturers of France.

This jury, after exhaustive examination and tests, adjudged that the Wheeler & Wilson machines were the best of all, and awarded that company the highest prize of honor, the GRAND PRIZE, giving other companies only gold, silver and bronze medals.

The French government, as a further recognition of superiority, decorated Mr. Nathaniel Wheeler, president of the company, with the Cross of the Legion of Honor, the most prized honor of France.

That is how the puzzle of the best sewing machine in the world was fully solved by the most competent authority in the world in favor of the No. 9 and No. 12 Wheeler & Wilson machines.

The No. 9, for family use, and the No. 12, for manufacturing use, are the best in the world today.

And now, when you want a sewing machine, if you do not get the best, it will be your own fault.

Ask your sewing machine dealer for the No. 9 Wheeler & Wilson machine, and if he does not keep them, write to us for descriptive catalogue, prices and terms.

## Ayer's

Sarsaparilla

Stands at the head of all blood

medicines. This position it has secured

by its intrinsic merit, sustained by

the opinion of leading physicians,

and by the certificates of thousands

who have successfully tested its

remedial worth. No other medicine

CURES

Scrofula, boils, pimples, rheumatism,

catarrh, and all other blood diseases.

There can be no question as to the

superiority of Ayer's Sarsaparilla over all

other blood-purifiers. If this was not the case,

the demand for it, instead of increasing yearly,

would have ceased long ago, like so many

other blood medicines I could name.—

"Two years ago I was troubled with

scurvy. It was all over my body, and the

doctors did not do me any good. At last

I took four bottles of Ayer's Sarsaparilla,

and was completely cured. I can sincerely

recommend it as a splendid blood-purifier."—S. Burt, Upper Kewick,

New Brunswick.

"My sister was afflicted with a severe

case of

SCROFULA

Our doctor recommended Ayer's Sarsaparilla

as being the best blood purifier with which

he was acquainted. We gave her this medicine,

and a complete cure was the result."—

Wm. O. Jenkins, Lawrence, Neb.

"When a boy I was troubled with a blood

disease which manifested itself in sores on

the legs. Ayer's Sarsaparilla was recom-

mended. I took a number of bottles, and was

cured. I have never since that time had a

recurrence of the complaint."—J. C. Thompson, Lowell, Mass.

The Republicans of Crow Wing County

Hold Their First Convention.

Agreeable to the call issued by J. J.

Howe, chairman of the county com-

mittee, a mass convention of Republi-

cans assembled at the court house on

Tuesday evening at 8 o'clock for the

purpose of electing delegates to the

district convention to be held in

Brainerd on Tuesday, May 3d, and to

the state convention to be held at St.

Paul on Thursday, May 5th. Despite the

rain which fell in torrents all day

long, and which kept many people,

especially from the country at home,

the room was comfortably well filled

and the meeting was an enthusiastic

one. After reading the call A. J.

Halsted called to preside in the

chair, and N. H. Ingersoll as sec-

retary. After considerable discussion

a motion made by Joel Smith that the

representation in the Brainerd con-

vention for Crow Wing county con-

sist of two delegates to be elected

from the country and four from the

city was adopted.

A motion being made for the chair

to appoint a committee of nine on

resolutions, Mr. Halsted selected J.

N. True, J. T. Frater, S. H. Parker,

Harry Patterson, Jos. Smith, J. Mc-

Murtry, Martin Craig, I. T. Dean and

Ed. Brehehey to act, and they retired

for deliberation. The convention

## THE WORK OF WESLEY

GROWTH IN POWER AND NUMBERS

OF THE METHODIST CHURCH.

Some Remarkable Statistics of Timely

Interest in Connection with the Ap-

proaching Quadrennial Conference.

The World's Field.

Sixteen thousand ministers in full con-

nection, 15,000 local preachers, 14,000

church edifices, 2,600,000 lay members,

1,800,000 Sunday school scholars, sev-

eral theological institutes, fifty-seven col-

leges, free classical seminaries and ten

four hundred and seventy-nine mis-

sionary stations are the elements which

will be represented in the approaching

conference of the Methodist Epis-

copal church at Omaha, Nebraska.

It is indeed necessary to say "in round

numbers," for the very latest statistics

of the church are not yet in. The figures

are collected. The church was never more

active, aggressive and prosperous than

now; the above figures are but a close ap-

proximation.

There was quite a heated discus-

sion in the United States Senate over

the alleged constitutional question in-

volved in appropriating \$100,000 to

entertain the G. A. R. encampment.

The division of the senatorial minds

on this constitutional question did not

show any political party line, but

sectional lines were marked. No

Northern Senator voted against the

appropriation. With the exception

of the two Maryland Senators, the

two Delaware Senators, and Faulkner

of West Virginia, no Southern Sena-

tor voted for the appropriation. Mc-

In Brazil an army officer who criticizes the Administration is dismissed from the service. It would be very sad if that sort of thing were to become Pan-American.

WOMEN now wear suspensories. This is the only distinguishing feature of man's attire thrown over the shoulders of the mothers and sisters of our children.

It has been decided to have Dr. Pierson remain at the Metropolitan Tabernacle, in London, Spurgeon's Church, for five years, at an annual salary of \$6,000. Dr. Pierson expects to visit America this summer.

HENRY HOWE, the "Grand Old Man" of the Lyceum Theater in London, was 80 years old on the last day of March. He is now playing the part of Griffith in "King Henry VIII."

It is thought that Justice Lamar's wretched health is largely due to his great absorption in his books. He is almost unmanageable by his wife when once he gets into his library. He is passionately fond of reading.

W. W. McALLISTER has written an article for an eastern paper on his experience as a farmer. The article shows that Mack didn't have half the success running a farm that he does running New York's 400.

MR. GLADSTONE is the owner of the largest lead pencil in the world. It is the gift of a pencil maker at Keswick, and is thirty-nine inches in length. In place of the customary rubber cap it has a gold cap. Its distinguished owner uses it for a walking stick.

QUEEN VICTORIA'S appetite, always a matter of envy among her more delicate intimates, is said to be absolutely unimpaired and remarkably hale and hearty, as it were, for a woman whose 73rd birthday is so near.

W. O. FISHBACK served the Circuit judge of his city, Tere Hants, in his paper; the judge sacked back with his little county jail and a thirty-day sentence for contempt. This is the freedom of the press mocked and the sanctity of the judicial emine soiled. But still honors are easy. Mr. Fishback is still sailing.

A MAX was guillotined in Switzerland the other day for assaulting and murdering a school teacher. It was the first execution in Switzerland for twenty-five years, capital punishment having been abolished in 1867, and that method of inflicting punishment having been resumed only recently.

The first female knights are said to have been women who stoutly defended Tortosa against the Moors in 1149, and were rewarded with large immunities for themselves and their descendants. When Edward III. found them gartered he bestowed the robes and badges on his Queen and on the wives and daughters of the other knights.

WHITMAN and Lowell were both born in the same year, and the death of the one has been closely followed by the death of the other. The two men were totally unlike and probably were mutually appreciative. Yet our English critics frequently couple Lowell and Whitman together as the two greatest American poets.

There is a very strong dislike to the bat among the peasants of south Germany. A feeling of disgust and fear takes possession of the farmer who finds bats in his chimney, not only because he believes the creatures will feed upon his pork that hangs, in the smoke, but because bats are regarded as unlucky and bring poverty and misfortune.

According to the school statistics of Finland there are this year 4,293 pupils attending the male schools and 5,567 the female schools. The population of Finland is 2,200,000, of which 200,000 are Swedes with a small admixture of other nationalities. To judge by the languages which the school children speak, the proportion of education is very unequally divided between the native Finns and three Swedish neighbors.

In every thousand children born in Ireland, twenty-eight die illegitimate; in England, forty-six; in Scotland seventy-nine. This is exactly the order of the educational statistics of those countries. Scotland has the largest proportion of university students to the population of any country in the world, and England comes second, while Ireland is low down on the list. So it seems that immorality is not the result of illiteracy.

EVIDENTLY the Navy Department has been pleased with the results of the experiments which it has been conducting at Indian Head with cellulose. It is announced that orders are to be issued to contractors at navy yards to pack the exposed parts of the new ships with this material. This cellulose possesses the quality of immediately swelling after it has been penetrated by a shot, thus preventing an inrush of water. Ships so protected will not sink when armor has been penetrated by shells, and in this way, it is believed, they can be made much more effective for service.

HYPOCRISY at last has been recognized by the law as having an existence. Its indiscriminate and improper practice has just been forbidden by law in Belgium. It is admitted that in medical hands it is a valuable agent for people afflicted with nervous and cerebral disorders but that in unscrupulous hands the control of one individual over another is so great that innocent persons may be compelled to commit crimes. The law provides that any one using hypocrisis without a physician's diploma shall be fined and imprisoned.

In Brazil an army officer who criticizes the Administration is dismissed from the service. It would be very odd if that sort of thing were to become Pan-American.

WOMEN NOW wear suspenders. This is the only distinguishing feature of man's attire thrown over the shoulders of the mothers and sisters of our children.

It has been decided to have Dr. Pierson remain at the Metropolitan Tabernacle, in London, Spurgeon's Church, for five years, at an annual salary of \$6,000. Dr. Pierson expects to visit America this summer.

HENRY HOWE, the "Grand Old Man" of the Lyceum Theater in London, was 80 years old on the last day of March. He is now playing the part of Griffith in "King Henry VIII."

It is thought that Justice Lamar's wretched health is largely due to his great absorption in his books. He is almost unmanageable by his wife when once he gets into his library. He is passionately fond of reading.

W. M. McALLISTER has written an article for an eastern paper on his experience as a farmer. The article shows that Mack didn't have half the success running a farm that he does running New York's 400.

MR. GLADSTONE is the owner of the largest lead pencil in the world. It is the gift of a pencil maker at Keswick, and is thirty-nine inches in length. In place of the customary rubber cap it has a gold cap. Its distinguished owner uses it for a walking stick.

QUEEN VICTORIA'S appetite, always a matter of envy among her more delicate intimates, is said to be absolutely unimpaired and remarkably hale and hearty, as it were, for a woman whose 73rd birthday is so near.

W. O. FISKE passed the Circuit judge of his city, Terre Haute, in his paper; the judge sassed back with his little county jury and a thirty-day sentence for contempt. This is the freedom of the press mocked and the sanctity of the judicial emine soiled. But still honors are easy. Mr. Fiske-better still sassing.

A MAN was guillotined in Switzerland the other day for assaulting and murdering a school teacher. It was the first execution in Switzerland for twenty-five years, capital punishment having been abolished in 1867, and that method of inflicting punishment having been resumed only recently.

The first female knights are said to have been women who stoutly defended Tortosa against the Moors in 1149, and were rewarded with large immunities for themselves and their descendants. When Edward III. founded the Garter he bestowed the robes and badges on his Queen and on the wives and daughters of the other knights.

WHITMAN and Lowell were both born in the same year, and the death of the one has been closely followed by that of the other. The two men were totally unlike and probably were mutually appreciative. Yet our English critics frequently couple Lowell and Whitman together as the two greatest American poets.

THERE is a very strong dislike to the bat among the peasants of South Germany. A feeling of disgust and fear takes possession of the farmer who finds bats in his chimney, not only because he believes the creatures will feed upon his pork that hangs in the smoke, but because bats are regarded as unlucky and bring poverty and misfortune.

According to the school statistics of Finland there are this year 4,293 pupils attending the male schools and 1,567 the female schools. The population of Finland is 2,200,000, of which 200,000 are Swedes with a small admixture of other nationalities. To judge by the languages which the school children speak, the proportion of education is very unequally divided between the native Finns and there Swedish neighbors.

Is every thousand children born in Ireland, twenty-eight illegitimate; in England, forty-six; in Scotland seventy-nine. This is exactly the order of the educational statistics of those countries. University studies to the population of any country in the world, and England comes second, while Ireland is low down on the list. So it seems that immorality is not the result of literacy.

EVIDENTLY the Navy Department has been pleased with the results of the experiments which it has been conducting at Indian Head with cellulose. It is announced that orders are to be issued to contractors at navy yards to pack the exposed parts of the new ships with this material. This cellulose possesses the quality of immediately swelling after it has been penetrated by a shot, thus preventing an inrush of water. Ships so protected will not sink when armor has been penetrated by shells, and in this way, it is believed, they can be made much more effective for service.

FOREIGN.

Baron Schaffer, an Austrian minister at Washington, has been ordered to return to his post at the Italian legation in Washington.

Formation of a new Italian cabinet has been completed. Its programme includes retrenchment in the army budget.

The condition of Grand Duke George, second son of the czar of Russia, who has been ill for some time past, has become worse.

The nikaido has appointed a committee of seven members, including five leading members of the cabinet, to study the treaties between Japan and the Western powers.

It is reported that a national loan of 20,000,000 lire has been authorized by the Italian government to cover the estimated deficits of 1888-1890, 1890-1891 and 1891-1892.

Is a fight between Mexicans, thought to be a remnant of Garza's band, and United States officers near Rio Grande. Sheriff Y. Kelly of Starr county and Deputy Sheriff Carroll were slightly wounded and two bandits were killed.

Arrived from La Guayra, which place the left April 8 and brought information of a battle between the government forces and revolutionaries.

A Summary of the Important Events of the Week in the Northwest.

Minnesota, Wisconsin, Iowa, North and South Dakota News in a Nutshell.

MINNESOTA.

W. H. Dixon, the widely known railroad man, is said to come from two commission firms in New York which desire the annulment of a concession given to the American "Red D" line steamships.

W. B. Barrett, of Los Angeles, was selected as the successor of Maj. Bonerok, of the California board of managers of national soldiers' homes.

A resolution was adopted by the house authorizing the civil service commission to investigate the alleged violation of the civil service law by certain officials in Baltimore.

Mr. Young, whom the senate legislated out of office, writes to Vice President Morgan, in which he says he is not the charges against him. The senate tables the letter.

PERSONAL.

FREDERICK MARTIN, of Boston, the German poet, died.

THOMAS A. MAXWELL, ex-member of congress from New York city and a well known newspaper man, died suddenly.

EX-SENATOR WILLIAM J. SWEENEY of New York, who died in the city of New York, was the longest lived of the long, contracted during his recent trip to Chicago.

At the age of 83, ex-Gov. Nathaniel S. Brown of New Hampshire is said to be the oldest living ex-governor—a regular old berry, so to speak.

FANNY CROSBY, who is 65 years old, pleads guilty to having written 3,000 letters to her husband, who is now in prison, and to have written them for no other reason than to cause a "very long letter."

BARON FAVA's only fear about his return to this country is that something will happen to him on the way. He is now in the hands of the police, and is being served up in the paper.

ROSEWELL SMITH, president of the Century Publishing company, died in New York. He had been ill for three years of Bright's disease, and during that time had three paralytic strokes.

SAMUEL JACKSON, the most famous pyrotechnist of the country, and the inventor of the present form of the "fireworks" died of heart failure at his home in Philadelphia. He was seventy years old.

TEY HENRY ALLEN, D. D., the well-known author of "The Story of the Bible," died at his home in New York. He was seventy-two years old. He was editor of the British Quarterly Review. He was twice elected chairman of the Congressional Union.

Capt. Aird, the retired commodore of the Allan line of steamships, after having crossed the Atlantic in safety more than a hundred times, was killed in a collision with a sailing vessel near Cowanville, Va.

CASUALTIES.

Further severe earthquake shocks are felt in various towns in California. Twelve men lost their lives in a Pennsylvania mine accident.

Seven men are blown to atoms by an explosion in powder works in New Jersey. Several persons are killed and a number of others injured.

Fire in a tenement house in St. Petersburg caused the loss of one hundred and thirty lives. It is thought that the bodies are beneath the debris.

JOHN BUNNET, of West Bay City, while in a boat in the harbor of the city, was killed by a falling tree. The tree was blowing in a strong wind and fell on the boat.

THE TOLLERS.

The Massachusetts house has passed the bill fixing ten hours as a day's work for railroad men.

DELEGATIONS representing the different seamen's organizations convened in Chicago recently to organize all American sailors into a single union.

THE RAILROADS.

NOTICE has been given by the Kansas City, that commencing June 1, all stop-over privileges will be discontinued.

## NOT TO BE TOLD QUIETLY.

A Boston Maid's Kindly Intention to be a Deaf-mute. She was a middle-aged woman dressed in black, and wearing eyeglasses says the Boston Journal. She carried both her head and her bundles in a way that indicated self-reliance, and, having failed to find a seat in the Old Colony car she entered first, although the train was now in motion she bravely crossed the platform and went into the next car.

A masculine eye would probably have noticed nothing peculiar in her personal appearance, but nearly every woman that she passed noticed that the new-comer still wore a draped overskirt and that this part of her attire, instead of having the necessary symmetry, was hitched around on one side in a way that was not only unfashionable, but entirely unbecoming. Woman like, they wanted to tell her of it.

"The girl repeated in substance what she had said before, and added humbly: 'I thought you would like to know, so as to fix it before you go on the street again.'"

"He?" said the woman, sharply. The girl repeated in substance what she had said before, and added humbly: 'I thought you would like to know, so as to fix it before you go on the street again.'"

"The woman didn't understand. She turned around, and throwing her head back, in order to direct her gaze through her glasses, carefully scrutinized the young lady's features. Then, she said: 'I don't think I know you.'"

"The young lady blushed. This recognition of her well-known face, and her voice that had been so long and so low, was not without effect. The passengers near by were becoming interested."

"I don't want to see you, dear, but your skirt is somewhat one-sided," said the woman, and she slowly repeated, "I don't think I know you."

"The woman had a puzzled look on her face, and she slowly repeated, 'I don't think I know you.'"

## SAWING WOOD.

The Business Too Engrossing to Permit of Conversation. I don't suppose the man was ever in politics or read a newspaper, says the Detroit Free Press, but one day as I drove by his cabin in the mountains he was out in front at a woodpile, with a saw, hard at work, while a thin, rawboned woman in a faded calico dress and a slab-sided sunbonnet sat on the cabin steps, smoking her pipe and watching him.

"Good morning," I said to him as I stopped my horse.

"Morning," he answered, so low I could scarcely hear him and without stopping his saw.

"Pleasant weather we're having," I ventured next, but he made no answer.

"Pretty bad roads you have around here," I said, still pleasantly, as he sawed.

"I'm selling sewing machines," I said, coming down at once to business, but he made no answer.

"Have you got one in your house?" I asked, after waiting a moment for the saw to stop.

"Don't you think you ought to have one?" was my next, as the saw kept ripping along.

No answer, and at last, quite provoked, I said:

"Why in thunder don't you talk?"

"He kept right on sawing, but, looking furtively over his shoulder toward his wife, who had never moved, he replied:

"Stranger, I am a sawin' wood. Go 'long to the house and let the old woman do the talkin'."

I went, but didn't sell a machine.

A Discontented Pumper. A small Scotch boy was summoned to give evidence against his father, who was accused of making disturbances on the streets. Said the bairn to him: "Come, my wee mon, speak the truth, and let us know all ye ken about this affair."

"Weel, ye gang along it and turn into the square, and cross the street."

"Yes, ye," said the bairn, encouragingly. "An' then ye gang across the square ye turn to the right, and up into High street, and keep on up High street till ye come to the church."

"Right, my lad, proceed," said his worship. "I know the old pump well."

"Well, said the boy, with the most insignificant simplicity, "ye gang and pump it, for ye'll pump me."

Not So Stupid. The overbearing ways of drill sergeants with new recruits are familiar gossip in the barracks of European countries.

On one occasion a recruit—a professional man—showed so little aptitude for military movements that the sergeant broke out to him:

"You blockhead! You are all such idiots as you in your family!"

"No," said the recruit, "I have a brother who is a great deal more stupid than I am."

"Possible? And what on earth does this incomparable blockhead do?"

"He is a sergeant!"

Cordial. The following extract is taken from a letter of thanks sent by a bride to one of her husband's friends:

Your lovely evening was received, and gives us both great pleasure. It is now in the parlor hanging above the piano, where we hope to see you and your family as often as you find it agreeable.

**Local News Notes.**

Judge Hawkins, of LaPrairie, was a  
 Brainerd visitor yesterday.

A. L. Hoffman has sold his con-  
 fectionery and cigar store to Robert  
 Caughie.

S. F. Alderman has been enjoying  
 a nice time this week wrestling with  
 the mumps.

The uniform ball of Brainerd Divi-  
 sion No. 7, U. R. K. P., occurs this  
 evening at Gardner Hall.

W. R. Phillips has decided to locate  
 at Red Cloud, Nebraska, and has left  
 for that place with his mother.

The W. C. T. U. will meet on Tues-  
 day afternoon at 3 o'clock at the Y.  
 M. C. A. parlor. All are welcome.

E. Fulton has gone to the Red Lake  
 country to work for the government  
 in appraising the Chippewa lands.

The Misses Annie and Grace Stratt  
 are spending a couple of weeks with  
 friends in Brainerd. (Perham Bulletin.)

J. H. Hallett will remove to Park  
 Rapids where he will engage in the  
 fish and trading business with the In-  
 dians.

A special meeting of the board of  
 education was called for Wednesday  
 evening but there was not a quorum  
 present.

See D. M. Clark & Co.'s new stock  
 of Wall Paper before you select your  
 spring house decorations. A nice  
 line just received.

President Ferris, of the First Na-  
 tional Bank, has been off duty this  
 week on account of having both hands  
 poisoned with wild ivy.

The burning out of a chimney at  
 Con. O'Brien's grocery store on Wed-  
 nesday evening during the high wind  
 caused quite an excitement.

A neck-tie sociable will be given by  
 the ladies of the Baptist society at the  
 residence of N. W. Wheatley this  
 (Friday) evening. Everybody invited.

Col. Canfield claims to have been  
 criminally libeled by the publication  
 of the articles in the Itasca county  
 papers and will attempt to prove it.

Hugo Ebinger, a resident of East  
 Brainerd, was adjudged insane Wed-  
 nesday by the Probate court and  
 taken to the asylum at Fergus Falls

The ball given by Pine City Lodge,  
 No. 81, B. of L. F., on Tuesday eve-  
 ning, was one of those enjoyable oc-  
 casions which the organization is noted  
 for giving annually. The attendance  
 was large and the lodge will realize a  
 nice sum from the proceeds.

The department was called out at  
 10:30 last night to extinguish a blaze  
 started in a manure heap in the rear  
 of a barn near H. McGinn's on  
 Broadway south. A suspicious look-  
 ing character seen lurking about the  
 premises in the early part of the eve-  
 ning probably set the fire. No dam-  
 age done.

The attention of our readers is  
 called to the advertisement of J. F.  
 McGinnis & Co. in this issue. The  
 entire day stock has been removed to  
 their store at the corner of Front and  
 Seventh streets, and will be sold at a  
 sacrifice for cash. This firm is a  
 strictly Brainerd institution and  
 should be patronized by Brainerd  
 people.

Invitations have been issued for a

 ern Pacific Library Association at  
 Gardner Hall on Friday evening, May  
 6th. The ball will be a very interesting  
 affair. Every person purchasing a  
 ticket is entitled to a year's member-  
 ship in the association with free use  
 of the books and periodicals. Music  
 will be furnished by Whitford's  
 orchestra, and the grand march will  
 begin at 9 p. m.

John Endres, one of the present  
 proprietors of the stage line between  
 Verndale and Park Rapids, was killed  
 at Detroit last week. He had forged  
 his father-in-law's name on some pa-  
 pers in order to raise a little money  
 and the Becker county sheriff had  
 arrested him and was taking him to  
 Detroit on No. 7. He escaped from the  
 sheriff and jumped from the train as  
 it was pulling into Detroit, but was  
 pulled out, he was thrown under the  
 wheels and his body cut in twain.

Another theory advanced is that he  
 committed suicide by throwing him-  
 self under the wheels. He leaves a  
 wife and one or two children at Ver-  
 ndale. (Staples World.)

WANTED—Girl for general house-  
 work, \$3 per week. C. H. PAINE.

W. A. M. Johnston has accepted a  
 position in J. H. Koop's dry goods  
 store at Staples.

A festival will be held at the Nor-  
 wegian-Lutheran church on Seventh  
 street, Saturday, May 21st; all are  
 cordially invited.

Wm. Myers, charged with assault  
 in the second degree, on William  
 Henricks, waived examination and  
 was bound over to the grand jury in  
 the sum of \$300.

A session of Oriental Council No.  
 0, will be held Saturday evening at  
 Odd Fellows hall, at which time ten  
 candidates will tread the road to the  
 height of Pilgrim honor.

The New Orleans (7) Creoles dis-  
 played a rocky show to a slim audi-  
 ence at the opera house last night.  
 The slack rope performance of La  
 She being the only redeeming feature.

H. Rosenblatt has secured the ser-  
 vices of A. Frandenthal, formerly with  
 Leopold Bros., who will take charge  
 of his dry goods department. The  
 gentleman has recently returned from  
 Montana.

The concert given for the benefit  
 of the Congregational church on  
 Monday evening was largely attended.  
 Our space is too limited to enter into  
 detail, although there were many  
 features which deserve special men-  
 tion.

The installation of the Rev. W. H.  
 Ware as pastor of the Presbyterian  
 church of this city will take place on  
 next Tuesday evening, May 3rd, at  
 7:30 o'clock. Ministers from abroad  
 are expected to be present to take part  
 in the services. The public generally  
 are cordially invited to attend.

A new grocery store will be opened  
 next week in the building formerly  
 occupied by Johnson & Bain, at the  
 corner of Front and Seventh streets,  
 by John McCarthy, Sr., and George  
 Redding. Both gentlemen are well  
 known to the Brainerd public and  
 their venture will undoubtedly be a  
 success from the start. Mr. Redding  
 has been connected with Koop Bros.  
 for several years.

The Northern Mill Co.  
 Matters in regard to the Northern  
 Mill Co. seem to be in very satisfactory  
 shape at this writing. The committee,  
 consisting of Judge Holland and  
 Lawyers McClenahan and Lum, who  
 were in St. Paul on Wednesday con-  
 ferred with the attorney of the com-  
 pany have returned, and now all that  
 remains is for the directors of the  
 company to sign the papers, a meet-  
 ing being called for that purpose,  
 which will be held within a week.  
 After this is done an election will be  
 called to vote the bonds, which will  
 be in the sum of \$100,000.

**An April Wedding.**  
 W. C. Duthie, of this city, and Miss  
 Emma Strait, of Jordan, were married  
 at the residence of the bride's aunt  
 in St. Paul on Wednesday, April 20th.  
 After the wedding Mr. and Mrs.  
 Duthie went to Winnipeg on a wed-  
 ding tour and will return to Brainerd  
 this week, when they will begin house-  
 keeping on Broadway north, where  
 the groom has prepared a nice home  
 for the reception of his bride. The  
 groom is a popular N. P. employee  
 and the bride is well known in this  
 city, having been connected with Mrs.  
 Pierce in the millinery business last  
 season.

**Entertainment at the Y. M. C. A.**  
 On Tuesday evening, May 3rd, will  
 be another one of these evenings of  
 mirth and merriment mixed with  
 musical melody that we have about  
 twice a month at the Y. M. C. A. As  
 it will be an entire change of program  
 you cannot afford to miss it. The  
 following is the program:

**They Celebrated.**  
 The reception and entertainment  
 tendered by Unity Lodge No. 194, I.  
 O. O. F., to the citizens of Brainerd  
 at the opera house on Wednesday  
 evening, in honor of the 73rd anni-  
 versary of the founding of the order  
 in America was highly enjoyed. The  
 opera house was filled to overflowing,  
 and even standing room taken in all  
 parts of the house long before the  
 time for the entertainment to com-  
 mence had arrived, and many were  
 deprived of the pleasure of being  
 present on account of the crowded  
 condition of the spacious building.

The stage was tastefully arranged  
 with the lodge emblems and the lodge  
 chairs were occupied by R. H. Paine,  
 Rev. J. W. Frizzell, Rev. J. A. Jenkin,  
 Rev. Wm. Wright and A. E. Losey.

Mr. Jenkin opened the entertain-  
 ment by stating the object, which was  
 followed by music from the orchestra  
 and the opening lodge ode. The  
 programs followed as published  
 last week and was highly enjoyed.

The singing by the Masonic quartette,  
 of Minneapolis, especially engaged  
 for the occasion, was grand, and the  
 individual members must have known  
 that their efforts were appreciated for  
 they were repeatedly recalled by the  
 audience. The whistling solos and  
 the local talent also featured the  
 entertainment.

The address by Rev. J. W. Frizzell,  
 of Waseca, formerly pastor of the Con-  
 gregational church in this city,  
 which we publish below, was deliv-  
 ered in that gentleman's original  
 style and was attentively listened to  
 by all.

The Odd Fellows of Brainerd have  
 every reason to feel proud of their  
 efforts and were complimented on all  
 sides. The two lodges in this city  
 have recently united and are doing  
 good work. They have a fine hall,  
 as good an attendance and a larger  
 membership than a majority of the  
 societies of that order in the north-  
 west.

The following is a synopsis of the  
 address of Rev. Frizzell:

I am glad to be called to celebrate a  
 union and not a division, a marriage  
 and not something of a sad and doleful  
 nature.

The study of union is one of the signs  
 of latter day glory. A sign of the age,  
 of peace, prosperity, harmony and right-  
 eousness. I am glad to be here in the  
 interest of the Independent Order of  
 Odd Fellows, one of the foremost benevo-  
 lent and fraternal organizations of the world.

Its Origin.  
 Some Odd Fellows in the past have  
 lived to show that we can boast a remote  
 antiquity, but this history has been com-  
 pletely given up. There is more or less  
 definite reference to Odd Fellows societies  
 since 1716, A. D. DeFoe speaks of lodges  
 as early as 1748, A. D. J. A. Montgomery  
 the great poet, composed a short poem  
 on the Odd Fellows in 1788, A. D. The  
 society is full of sympathy with the order.  
 In the early part of the century it be-  
 came firmly established in England.

Origin in America.  
 The Odd Fellows who came from Eng-  
 land, were wont to meet together in New  
 England from 1820 to 1810, A. D. On  
 April 20th, 1810, Thomas White and  
 four others formally organized the In-  
 dependent Order of Odd Fellows in  
 America. Before he died, he lived to see  
 the order grown to 20,000 strong. He  
 lived to see the lodges accumulate a  
 revenue from dues of over \$300,000.  
 He lived to see \$1,000,000 spent in re-  
 lieving the distressed.

At the present time the order is spend-  
 ing over \$5,000,000 a year in benevo-  
 lent objects. Over 200,000 men are now  
 in the order.

2. Significant name of the order.—The  
 Independent Order of Odd Fellows.  
 The term INDEPENDENT contains a  
 volume of meaning. The Independents  
 have remade England and are remod-  
 eling the world. They have been the  
 pioneers in modern democracy and in  
 most of our civil and religious liberties  
 in this country. They presided over the  
 birth of this country, guided it in its  
 youth, preserved its integrity, rescued it  
 from slavery and is one of the great hopes  
 of the future.

The term Odd Fellows has been  
 criticised by some. What the world  
 needs is more of the odd. All great reformers  
 were men who were not afraid to be odd.  
 All great reformers were men who were  
 not afraid to be odd. To be afraid to be  
 odd is to stagnate all progress, and to  
 reduce everything to a dead uniformity.  
 To be odd leaves room for spontaneity,  
 for inspiration, for growth. China is an  
 example of this. The theory of life is to  
 look forever in reverence to the past.  
 Look out, look on, look up, and do not  
 be afraid to be odd. Do not say you  
 please, but always please to do right.  
 Salt is one of the oddest things in the  
 world, it imparts its qualities to what-  
 ever touches it, and as the world is full  
 of nothing of other things. You should be  
 like salt, curative and preservative.

3. Principles of the order.—The  
 order is not a religious institution,  
 to maintain sacraments and ordinances,  
 but it is a limited Christian brotherhood,  
 arising from the fact of being a universal  
 Christian brotherhood, and in this respect  
 is broader than any institution.

The order rests on two great prin-  
 ciples, viz: The fatherhood of God and  
 the brotherhood of man.

4. Trust in God. The workings and  
 ritual of the lodge teaches faith in God  
 as one of the necessary things in the  
 life of a true Odd Fellow.

5. It believes in the Bible and from  
 it draws most of its symbolism to illus-  
 trate its teachings and principles, i. e. it  
 illustrates its teachings by the brotherhood  
 by the name of the good Samaritan.

6. It believes in prayer and has a  
 chair in every lodge room devoted to  
 prayer, and constitutes an entirely new  
 chapter in general religion.

"Hypnotism," says Braid, "does not  
 comprise only one condition; it is rather  
 a series of different points, capable of  
 infinite variety, extending from the  
 lightest dreams in which the natural  
 functions are intensified, to the pro-  
 foundest state of coma, from which  
 the consciousness and will are com-  
 pletely absent. In another place he  
 speaks with more detail about hypo-  
 notic coma. We are right, therefore,  
 in saying that he foresaw and de-  
 scribed the different phases of hypo-  
 notic phenomena, both the change-  
 ment in the state of the state of  
 catalepsy and somnambulism, which  
 he described in very clear language.

**Almost Remembered.**  
 Ernest's grandfather is a doctor,  
 and had been for some time treating a  
 patient for St. Vitus' dance.

Ernest has seen the sufferer from  
 the strange nervous disease, and felt  
 much sympathy for him.

The other day he hurried from his  
 grandfather's office to his mother's  
 room, another poor little boy who has  
 the name—the I can almost think of the  
 name—the St. Patrick's jump!"

**FOOD AND DAIRY COMMISSION.**  
 Two Essentials for a Baking Powder  
 That will make Perfect Bread.

The late report of the Minnesota  
 State Food and Dairy Commission con-  
 tains the result of a series of experi-  
 ments made by Prof. C. W. Drew,  
 State Chemist, to determine the  
 strength and keeping qualities of the  
 various baking powders.

The report attaches great impor-  
 tance to these experiments. Baking  
 powders that vary in strength, or that  
 readily lose strength before use, are  
 unreliable and will not give even re-  
 sults; besides, it is an indication of  
 the use of improper ingredients in  
 their compounding. The tests showed  
 the strength of leavening power of  
 the Royal very much greater than  
 that of the others. The uniformity  
 of strength of all the samples of Royal  
 tested, no matter what their age, was  
 remarkable. Its leavening power was  
 practically unimpaired even in the  
 oldest specimens. The difference in  
 the amount of leavening gas in differ-  
 ent samples of other brands was so  
 great as to seriously impair their use-  
 fulness in baking. As much as 25  
 per cent. loss was found in samples a  
 few months old. All the samples of  
 Royal examined by State Chemist  
 Drew were reported of satisfactory  
 strength and quality.

Dr. Drew states that the Royal be-  
 ing of greater strength than any other,  
 and possessing better keeping quali-  
 ties, it is the natural conclusion that  
 it is the best baking powder made.

**THE GROWTH OF HYPNOTISM.**  
 Found Under Different Names at All  
 Periods of Human History.

The history of hypnotism, says Dr.  
 Lutz in the Fortnightly Review, forms  
 part of the history of the marvelous in  
 human existence. Any one may satisfy  
 himself by reading special books on  
 this subject. The scope of this article  
 does not allow me to lay any further  
 stress upon it. In reality, hypnotism  
 is found under different names at  
 all periods of history, from the incanta-  
 tions of the ancient Egyptian magi-  
 cians down to the fascinations of Mesmer  
 and the investigations of Braid. These  
 two persons began to separate the  
 wheat from the chaff, and went so far  
 as to show what was real and truly  
 scientific in that series of fanciful  
 practices, bordering on witchcraft,  
 which, under the most varied aspects,  
 have many believers in the credulous  
 who are always prone to swallow  
 marvels.

Modern hypnotism owes its name  
 and appearance in the realm of science  
 to the investigations made by Braid.  
 He is its true creator; he made it what  
 it is, and, above all, he gave em-  
 phasis to the experimental truth by  
 means of which he proved that, when  
 hypnotic phenomena are called into  
 play, they are wholly independent  
 of any supposed influence of the hypnotist  
 upon the hypnotized, and that the  
 hypnotized person simply seizes  
 himself by reason of latent  
 capacities in him which are artificially  
 developed.

Braid demonstrated that in this  
 series of remarkable phenomena hypo-  
 notism, acting upon a human subject  
 as upon a fellow field, merely set in  
 motion a string of silent faculties  
 which only needed its assistance to  
 reach their development. Here we  
 have a new and a new idea and a  
 phenomena of the first importance  
 which constitutes one of the most in-  
 teresting anxieties of the question.

In this field of new research Braid  
 J. further opportunity of evincing  
 his clear-sightedness in many other  
 particulars, and it may be said of him  
 the outset he foresaw the different  
 stages of hypnotism just as they have  
 been since defined in France. He  
 perceived their different manifestations  
 and he thus laid the first foundation  
 of the structure which has been so for-  
 tunately developed by workers in dif-  
 ferent countries, and which for the  
 future constitutes an entirely new  
 chapter in general neurology.

"Hypnotism," says Braid, "does not  
 comprise only one condition; it is rather  
 a series of different points, capable of  
 infinite variety, extending from the  
 lightest dreams in which the natural  
 functions are intensified, to the pro-  
 foundest state of coma, from which  
 the consciousness and will are com-  
 pletely absent. In another place he  
 speaks with more detail about hypo-  
 notic coma. We are right, therefore,  
 in saying that he foresaw and de-  
 scribed the different phases of hypo-  
 notic phenomena, both the change-  
 ment in the state of the state of  
 catalepsy and somnambulism, which  
 he described in very clear language.

 Stevens Point, located on the Wiscon-  
 sin Central Lines, at the gate-way to  
 the vast forest region which extends  
 North to Lake Superior, a distance of  
 200 miles without a break, on account  
 of its vast lumber interests. The  
 Wisconsin River to which the lum-  
 berman have given the familiar and  
 somewhat affectionate title of "Old  
 Wisconsin," not alone acts as a lum-  
 ber feeder to the city by furnishing  
 through its numerous tributaries an  
 outlet for thousands of acres of pine  
 in the upper country, but it furnishes  
 a water power that is second only to  
 that of Neenah and Menasha, which  
 cities are also located on the "Central."  
 Millions of feet of lumber are cut every  
 year, giving employment to hundreds  
 of men. In addition to the lum-

### Local News Notes.

Judge Hawkins, of LaPrairie, was a Brainerd visitor yesterday.

A. L. Hoffman has sold his confectionery and cigar store to Robert Caniglia.

S. F. Alderman has been enjoying a nice time this week wrestling with the mumps.

The uniform ball of Brainerd Division No. 7, U. R. K. P., occurs this evening at Gardner Hall.

W. R. Phillips has decided to locate at Red Cloud, Nebraska, and has left for that place with his mother.

The W. C. T. U. will meet on Tuesday afternoon at 3 o'clock at the Y. M. C. A. parlor. All are welcome.

E. Fulton has gone to the Red Lake country to work for the government in appraising the Chippewa lands.

The Misses Annie and Grace Strutt are spending a couple of weeks with friends in Brainerd.—(Perham Bulletin.)

J. H. Hallett will remove to Park Rapids where he will engage in the fish and trading business with the Indians.

A special meeting of the board of education was called for Wednesday evening but there was not a quorum present.

See D. M. Clark & Co.'s new stock of Wall Paper before you select your spring house decorations. A nice line just received.

President Ferris, of the First National Bank, has been off duty this week on account of having both hands poisoned with wild ivy.

The burning out of a chimney at Con. O'Brien's grocery store on Wednesday evening during the high wind caused quite an excitement.

A neck-tie sociable will be given by the ladies of the Baptist society at the residence of N. W. Wheatley this (Friday) evening. Everybody invited.

Col. Canfield claims to have been criminally libeled by the publication of the articles in the Itasca county papers and will attempt to prove it.

Hugo Ebinger, a resident of East Brainerd, was adjudged insane Wednesday by the Probate court and taken to the asylum at Fergus Falls by Deputy Gunn yesterday.

Co. K, of the Minnesota National Guard, of this city has been mustered out and is a thing of the past. Here is a chance for Little Falls to make another step in advancement.

That elegant new line of furniture which D. M. Clark & Co. have ordered will be here next week and open for inspection by Wednesday. See it before you purchase.

James Keelan has bought out Mr. Sargent's business at the corner of Sixth and Laurel streets, and will run the hotel and bar, Wm. Heamore being in charge. The Central House has been enjoying a good trade lately.

The ball given by Pine City Lodge, No. 81, B. of L. F., on Tuesday evening, was one of those enjoyable occasions which the organization is noted for giving annually. The attendance was large and the lodge will realize a nice sum from the proceeds.

The department was called out at 10:30 last night to extinguish a blaze started in a manure heap in the rear of a barn near H. McGinn's on Broadway south. A suspicious looking character seen lurking about the premises in the early part of the evening probably set the fire. No damage done.

The attention of our readers is called to the advertisement of J. F. McGinnis & Co. in this issue. The entire day stock has been removed to their store at the corner of Front and Seventh streets, and will be sold at a sacrifice for cash. This firm is a strictly Brainerd institution and should be patronized by Brainerd people.

Invitations have been issued for a benefit ball to be given by the Northern Pacific Library Association at Gardner Hall on Friday evening, May 6th. The ball will be a very interesting affair. Every person purchasing a ticket is entitled to a year's membership in the association with free use of the books and periodicals. Music will be furnished by Whitford's orchestra, and the grand march will begin at 9 p. m.

John Endres, one of the present proprietors of the stage line between Verndale and Park Rapids, was killed at Detroit last week. He had forged his father-in-law's name on some papers in order to raise a little money and the Becker county sheriff had arrested him and was taking him to Detroit on No. 7. He escaped from the sheriff and jumped from the train as it was pulling into Detroit; but in pulling out, he was thrown under the wheels and his body cut in twain. Another theory advanced is that he committed suicide by throwing himself under the wheels. He leaves a wife and one or two children at Verndale.—(Staples World.)

## WANTED—Girl for general housework, \$3 per week. C. H. PAINE.

W. A. M. Johnston has accepted a position in J. H. Koop's dry goods store at Staples.

A festival will be held at the Norwegian-Lutheran church on Seventh street, Saturday, May 21st; all are cordially invited.

Wm. Myers, charged with assault in the second degree, on William Henricks, waived examination and was bound over to the grand jury in the sum of \$300.

A session of Oriental Council No. 9, will be held Saturday evening at Odd Fellows hall, at which time ten candidates will tread the road to the height of Pilgrim honor.

The New Orleans (7) Creoles displayed a rocky show to a slim audience at the opera house last night. The slack rock performance of La She being the only redeeming feature.

H. Rosenblatt has secured the services of A. Frandenthal, formerly with Leopold Bros, who will take charge of his dry goods department. The gentleman has recently returned from Montana.

The concert given for the benefit of the Congregational church on Monday evening was largely attended. Our space is too limited to enter into detail, although there were many features which deserve special mention.

The installation of the Rev. W. H. Ware as pastor of the Presbyterian church of this city will take place on next Tuesday evening, May 3rd, at 7:30 o'clock. Ministers from abroad are expected to be present to take part in the services. The public generally are cordially invited to attend.

A new grocery store will be opened next week in the building formerly occupied by Johnson & Bain, at the corner of Front and Seventh streets, by John McCarthy, Sr., and George Redding. Both gentlemen are well known to the Brainerd public and their venture will undoubtedly be a success from the start. Mr. Redding has been connected with Koop Bros. for several years.

The Northern Mill Co.

Matters in regard to the Northern Mill Co. seem to be in very satisfactory shape at this writing. The committee, consisting of Judge Holland and Lawyers McClenahan and Lum, who were in St. Paul on Wednesday conferring with the attorney of the company have returned, and now all that remains is for the directors of the company to sign the papers, a meeting being called for that purpose, which will be held within a week. After this is done an election will be called to vote the bonds, which will be in the sum of \$100,000.

### They Celebrated.

The reception and entertainment tendered by Unity Lodge No. 194, I. O. O. F., to the citizens of Brainerd at the opera house on Wednesday evening, in honor of the 73rd anniversary of the founding of the order in America was highly enjoyed. The opera house was filled to overflowing, and even standing room taken in all parts of the house long before the time for the entertainment to commence had arrived, and many were deprived of the pleasure of being present on account of the crowded condition of the spacious building.

The stage was tastefully arranged with the lodge emblems and the lodge chairs were occupied by R. H. Paine, Rev. J. W. Frizzell, Rev. J. A. Jenkins, Rev. Wm. Wright and A. E. Losey. Mr. Jenkins opened the entertainment by stating the object, which was followed by music from the orchestra and the opening lodge ode. The programme followed as published last week and was highly enjoyed. The singing by the Masonic quartette, of Minneapolis, especially engaged for the occasion, was grand, and the individual members must have known that their efforts were appreciated for they were repeatedly recalled by the audience. The whistling solos and the local talent were also features that deserve special mention. The address by Rev. J. W. Frizzell, of Waseca, formerly pastor of the Congregational church in this city, which we publish below, was delivered in that gentleman's original style and was attentively listened to by all.

The Odd Fellows of Brainerd have every reason to feel proud of their efforts and were complimented on all sides. The two lodges in this city have recently united and are doing good work. They have a fine hall, as good an attendance and a larger membership than a majority of the societies of that order in the northwest.

The following is a synopsis of the address of Rev. Frizzell:

I am glad to be called to celebrate a union and not a divorce, a marriage and not something of a sad and doleful nature.

The study of union is one of the signs of latter day glory. A sign of the age, of peace, prosperity, harmony and righteousness. I am glad to be here in the interest of the Independent Order of Odd Fellows, one of the foremost benevolent and fraternal organizations of the world.

1. Origin.

Some Odd Fellows in the past have lived to show that we can be a remote antiquity, but this theory has been completely given up. There are more or less definite reference to Odd Fellows societies since 1716, A. D. DeFoe speaks of lodges as early as 1645, D. J. Montgomery, the great poet, composed a short poem on the Odd Fellows in 1788, A. D. The poem is full of sympathy with the order. In the early part of the century it became firmly established in England.

2. The Old Fellows who came from England, were wont to meet together in New England from 1802 to 1819, A. D. On April 20th, 1819, Thomas Widley and four others formally organized the Independent Order of Odd Fellows in America. Before he died, he lived to see the order grown to 200,000 strong. He lived to see the lodges accumulate a revenue from dues of over \$20,000,000. He lived to see \$9,000,000 spent in relieving the distressed.

At the present time the order is spending over \$3,000,000 a year in benevolent objects. Over 700,000 men are now in the order.

3. Significant name of the order.—The Independent Order of Odd Fellows: The term INDEPENDENT contains a volume of meaning. The independent have renounced England and are remodeling the world. They have been the pioneers in modern democracy and in most of our civil and religious liberties in this country. They presided over the birth of this country, guided it in its youth, preserved its independence, rescued it from slavery and is one of the great hopes of the future.

The term Odd Fellows has been criticized by some. What has the word means men that are not afraid to be odd. All great reformers were men who were afraid to be odd. To be afraid to be odd is to stagnate all progress, and to reduce everything to a dead uniformity. To be odd leaves room for spontaneity, for inspiration, for growth. China is an example of those whose theory of life is to look forever in reverence to the past. It looks out, looks up, and has not a word to say for itself. It is not afraid to be odd. Do just as you please, but always please to do right. It is not afraid to be odd in the world, it imparts its qualities to whatever it touches, but assimilates little or nothing of other things. You should be like salt, curative and preservative.

4. Principles of the Order.

The order is not a religious institution, to maintain sacraments and ordinances, but it is a limited Christian brotherhood. Christianity aims at being a universal religion, but this order in this respect is broader than any institution.

1. The order rests on two great principles, viz: The fatherhood of God and the brotherhood of man.

2. Trust in God. The workings and ritual of the lodges teaches faith in God as one with the universe, and that the life of a true Odd Fellow.

3. It believes in the Bible and from it draws most of its symbolism to illustrate its teachings and principles. It illustrates its teachings on brotherhood by the parable of the good Samaritan.

4. It believes in a happy and has a chair in every lodge room devoted to that channel of divine intercourse with God, for that every lodge shall be opened and closed with prayer.

5. It believes in caring for and in bearing the burdens of others. It fulfills the apostolic injunction: "Bear one another's burdens and so fulfill the law of Christ," to the extent of three million dollars last year.

6. It believes in brain culture, and gives of its funds to educate the orphan.

7. It believes in a high standard of manhood, higher than the barbaric standards set up by many, such as seeing who can throw a weight the further, who can run a jump most like a deer, or hug most like a bear. It believes in developing a healthy manhood, physically, morally, and civically.

8. It has a place for woman, and believes that she can keep a secret. Ladies, I commend to you Rebecca Odd Fellowship.

9. It is one of the stomachs of the republic, aiding in assimilating the tide of foreign emigrants that is constantly coming to this country—the tide of emigration that has been coming to this country for so many years like the deposit that the Nile brings down when it overflows its banks; it is a maloral deposit at first but afterwards a profitable fertilizer.

10. It acts like oil poured on the everlasting conflict of religious ideas. It is a meeting ground for men of all religious creeds. It demonstrates that it is possible for all these men to fraternize and act a practical Christianity together.

11. It is a secret society, but its secrecy is commendable. Nature is full of secrets.

The place and mission of the order today. As long as there are men distressed, as long as there are widows and orphans to educate, as long as there is a place for friendship, love and truth, as long as there is a chance for the diffusion of the principles of benevolence and charity, there will be place for Odd Fellowship.

I hope your lesson of unity may be learned by many other organizations. I hope the spirit of unity which you celebrate on a wedding occasion may become contagious.

In view of the receding shades of Winter and Evergreen, and as we stand in the youthful presence of Unity Lodge, I warn you against the one great danger of unity, viz: stagnation. See that your new lodge for all you are worth, talk it up. Bring its merits before the sensible men of the community, and may many join your ranks.

### FOOD AND DAIRY COMMISSION.

Two Essentials for a Baking Powder That will make Perfect Bread.

The late report of the Minnesota State Food and Dairy Commission contains the result of a series of experiments made by Prof. C. W. Drew, State Chemist, to determine the strength and keeping qualities of the various baking powders.

The report attaches great importance to these experiments. Baking powders that vary in strength, or that really lose strength before use, are unreliable and will not give even results; besides, it is an indication of the use of improper ingredients in their compounding. The tests showed the strength of leavening power of the Royal very much greater than that of the others. The uniformity of strength of all the samples of Royal tested, no matter what their age, was remarkable. Its leavening power was practically unimpaired even in the oldest specimens. The difference in the amount of leavening gas in different samples of other brands was so great as to seriously impair their usefulness in baking. As much as 24 per cent loss was found in samples a few months old. All the samples of Royal examined by State Chemist Drew were reported of satisfactory strength and quality.

Dr. Drew states that the Royal being of greater strength than any other, and possessing better keeping qualities, it is the natural conclusion that it is the best baking powder made.

### THE GROWTH OF HYPNOTISM.

#### Found Under Different Names at All Periods of Human History.

The history of hypnotism, says Dr. Lutz in the Fortnightly Review, forms part of the history of the marvelous in human existence. Any one may satisfy himself by reading special books on this subject. The scope of this article does not allow me to say any further stress upon it. In reality, hypnotism is found under different names at all periods of history, from the incantations of the ancient Egyptian magicians down to the fascinations of Mesmer and the investigations of Braid. These two persons began to separate the wheat from the chaff, and went so far as to show what was real and truly scientific in that series of fanciful practices, bordering on witchcraft, which, under the most varied aspects, have many believers in the credulous who are always prone to swallow marvels.

Modern hypnotism owes its name and appearance in the realm of science to the investigations made by Braid. He is its true creator; he made it what it is, and above all, he gave emphasis to the experimental truth by means of which he proved that, when hypnotic phenomena are called into play, they are wholly independent of any supposed influence of the hypnotist upon the hypnotized, and that the hypnotized person simply reacts upon himself by reason of latent capacities in him which are artificially developed.

Braid demonstrated that in this series of remarkable phenomena hypnotism, acting upon a human subject as upon a fellow field, merely set in motion a string of silent faculties which only needed its assistance to reach their development. Here we obviously have a new idea and a phenomena of the first importance which constitutes one of the most interesting chapters of the question.

In this field of new research Braid had further opportunity of evincing his clear-sightedness in many other particulars, and it may be said of him the outset he followed the different stages of hypnotism just as they have been since defined in France. He perceived their different manifestations and he thus laid the first foundation of the structure which has been so fortunately developed by workers in different countries, and which for the future constitutes an entirely new chapter in general psychology.

"Hypnotism," says Braid, "does not comprise only one condition; it is rather a series of different points, capable of infinite variety, extending from the lightest dreams in which the natural faculties are unmodified to the profoundest state of coma, from which the conscience and the will are completely absent." In another place he speaks with more detail about hypnotic coma. We are right, therefore, in saying that he fore-saw and described the different phases of hypnotic phenomena, both the lethargy, which he calls coma, and the state of catalepsy and somnambulism, which he described in very clear language.

#### Almost Remembered.

Ernest's grandfather is a doctor, and had been for some time treating a patient for St. Vitus' dance.

Ernest had such the sufferer from the strange nervous disease, and felt much sympathy for him.

The other day he hurried from his grandfather's office to his mother's room to say, "O mamma, mamma, I want another poor little boy who has the St. Vitus' dance. I am almost think of the name—the St. Patrick's jump!"

WOMEN WHO WRITE SENSATIONAL. This is the only distinguishing feature of man's active life shown on the shoulders of the mothers and sisters of our children.

It has been decided to have Dr. Pierson remain at the Metropolitan Tabernacle, in London, Spurgeon's Church, for five years, at an annual salary of \$6,000. Dr. Pierson expects to visit America this summer.

HENRY HOWE, the "Grand Old Man" of the Lyceum Theater in London, was 80 years old on the last day of March. He is now playing the part of Griffith in "King Henry VIII."

It is thought that Justice Lamar's wretched health is largely due to his great absorption in his books. He is almost morose and irascible by his wife when once he gets into his library. He is passionately fond of reading.

WARD McALLISTER has written an article for an eastern paper on his experience as a farmer. The article shows that Mack didn't have half the success running a farm that he does running New York's 100.

MR. GLADSTONE is the owner of the largest lead pencil in the world. It is the gift of a pencil maker at Keswick, and is thirty-nine inches in length. In place of the customary rubber cap it has a gold cap. Its distinguished owner uses it for a walking stick.

QUEEN VICTORIA'S appetite, always a matter of envy among her more delicate intimates, is said to be absolutely unimpaired and remarkably halcyon and healthy, as it were, for a woman whose 73rd birthday is so near.

W. O. FISHBACH passed the Circuit judge of his city, Terre Haute, in his paper; the judge sassed back with his little county jail and a thirty-day sentence for contempt. This is the freedom of the press mocked and abused by the judges of the United States.

A MAN was guillotined in Switzerland the other day for assaulting and murdering a school teacher. It was the first execution in Switzerland for twenty-five years, capital punishment having been abolished in 1867, and that method of inflicting punishment having been resumed only recently.

The first female knights are said to have been women who stoutly defended Tortosa against the Moors in 1149, and were rewarded with large immunities for themselves and their descendants. When Edward III. founded the order he bestowed titles and badges on his queen and on the wives and daughters of the other knights.

WHITMAN and Lowell were both born in the same year, and the death of the one has been closely followed by the death of the other. The two men were totally unlike and probably were mutually appreciative. Yet our English critics frequently couple Lowell and Whitman together as the two greatest American poets.

THERE is a very strong dislike to the bat among the peasants of south Germany. A feeling of disgust and fear takes possession of the farmer who finds bats in his chimney, not only because he believes the creatures will feed upon his pork that hangs, in the smoke, but because bats are regarded as unlucky and bring poverty and misfortune.

ACCORDING to the school statistics of Finland there are this year 4,293 pupils attending the male schools and 1,567 the female schools. The population of Finland is 2,200,000, of which 200,000 are Swedes with a small admixture of other nationalities. To judge by the languages which the school children speak, the proportion of education is very unequally divided between the native Finns and the Swedish neighbors.

In every thousand children born in Ireland, twenty-eight are illegitimate; in England, forty-six; in Scotland seventy-nine. This is exactly the order of the educational statistics of those countries. Scotland has the highest proportion of university students to the population of any country in the world, and England comes second, while Ireland is low down on the list. So it seems that immorality is not the result of literacy.

EVIDENTLY the Navy Department has been pleased with the results of the experiments which it has been conducting at Indian Head with cellulose. It is announced that orders have been issued to contractors at navy yards to pack the exposed parts of the new ships with this material. This cellulose possesses the quality of immediately swelling after it has been penetrated by a shot, thus preventing an inrush of water. Ships so protected will not sink when armor has been penetrated by shells, and in this way, it is believed, they can be made much more effective for service.

HYPNOTISM at last has been recognized by the law as having an existence. Its indiscriminate and improper practice has just been forbidden by law in Belgium. It is a admitted that in medical hands it is a valuable agency for people afflicted with nervous and cerebral disorders but that in unscrupulous hands the control of one individual over another is so great that innocent persons may be compelled to commit crimes. The law provides that any one using hypnotism shall be fined and imprisoned.

His Eye Was Cold. "Ah, yes," she murmurs, "you say that you love me. What I find in your eyes but coldness. No, you wrong me. I find I say I feel—so deeply." "My dear, you don't look it." "Tell me, dearest, tell me that you love a man with a glass eye?" "Then she faints."
